1. Overview

This mobile banking application provides end-to-end digital banking services including account management, transactions, deposits, and card management.

2. Purpose

To enable customers to manage debit card transaction limits securely via mobile app.

3. Business Objective

Enhance customer experience, improve security, and reduce dependency on branch visits.

4. Scope

- Enable/disable POS, ATM, Online, Contactless
- Set transaction limits
- Real-time updates

5. Gap Analysis

Current system lacks digital control, real-time updates, and user flexibility.

6. Proposed Solution

Database: DEBIT_CARD_LIMIT_DTL

Transaction logging: CARDLMT

7. UI Implementation

- Debit Card → Manage → Limit Management
- Set Transaction Limit
- Tabs: Domestic & International
- Controls: Toggle + Slider + Input fields

8. Validation Rules

- Numeric values only
- Within allowed range

9. Save & Confirmation Flow

9.1 Save Button

- Saves configured limits

9.2 Review Screen

- Displays updated limits

9.3 Confirm Changes

- User confirms changes

9.4 Authentication

- MPIN validation required

9.5 Success Message

- “Limits successfully updated”

- “Your transaction limits have been updated successfully.”

9.6 Final Step

- Click OK → Redirect to Debit Card Section

10. End-to-End Flow

Configure → Save → Review → Confirm → MPIN → Success → Redirect

11. Stakeholders and Approvals
